Abstracts

Stamping a lanyard usually involves adding a lanyard to the edge or corners of paper or cardstock so they can be hung on a wall, display stand, or other support. These lanyards are typically made from stronger materials such as nylon, cotton rope, or rope and are attached to the edge of the paper or card using embossing or heat-pressing techniques. This design can make items easier to display and store, while also making it convenient for users to hang or carry. Imprinted lanyards are commonly found on stationery, gifts, labels and other products, adding convenience and practicality to them.
