## Abstracts

According to our (Global Info Research) latest study, the global Inclined Globe Valve market size was valued at US\$ 1449 million in 2024 and is forecast to a readjusted size of USD 2095 million by 2031 with a CAGR of 5.6% during review period.

An Inclined Globe Valve is a type of globe valve where the valve body is designed with the inlet and outlet ports at an angle (usually around 45° or more) to each other, rather than in a straight line. This inclined configuration allows for improved flow characteristics, reduced pressure drop compared to standard globe valves, and easier installation in certain piping layouts.
