Abstracts

Inclinometer is used heavily in industrial, construction, and electronic application for measuring angles of any slope or inclination with respect to the gravity by introducing a reference horizon.

Scope of the Report:

This report focuses on the Inclinometers in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The inclinometers vary from one axis to 9 axes and more. These instruments are also known by different names like tilt sensor, level gauge, and level meter, gradiometer, tilt indicator, or slope meter.

One of the primary drivers for this market is the high rate of adoption of micro-electro-mechanical systems (MEMS) in consumer electronic devices. MEMS in mobile devices are used to tap, scroll, tilt, rotate, and switch from horizontal and vertical displays. Also, microphones drive a large part of the MEMS market for mobile devices. These are used for providing high-definition audio quality for video recording. They also improve the accuracy of voice command functions.

The worldwide market for Inclinometers is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
