Abstracts

The global Inclusive Finance market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Inclusive finance, also known as 'microfinance,' refers to a financial service model aimed at solving the problems of financial service accessibility, universality, and availability, serving impoverished and vulnerable groups and regions, promoting sustainable financial development, and promoting economic and social development.

The main objective of inclusive finance is to provide financial services and products such as savings, credit, payment, and insurance to impoverished and vulnerable groups and regions, so as to increase income, improve living conditions, and alleviate poverty.

Inclusive finance can not only help impoverished areas and groups obtain financial services, but also promote the stability and healthy development of the financial market. The promotion of inclusive finance can alleviate the problem of inadequate financial service resources, provide financial services to more people, and increase the coverage and contribution rate of the financial market.
