Abstracts

According to our latest research, the global Indirect Auto Finance market size will reach USD 8149 million in 2031, growing at a CAGR of 8.5% over the analysis period.

Indirect auto finance refers to a financing arrangement where a dealership acts as an intermediary between the customer and the lender, typically a bank, credit union, or other financial institution. In this process, the dealership helps the buyer secure a loan for purchasing a vehicle, often offering a variety of financing options from multiple lenders. The customer works with the dealership's finance department, which gathers the necessary financial information and submits loan applications on their behalf. Once approved, the customer is presented with loan terms, and if accepted, the lender provides the funds to the dealership, which then completes the sale. Indirect auto financing is commonly used because it offers convenience, as customers can shop for both the vehicle and the financing in one location.
