According to our (Global Info Research) latest study, the global Indoor Vacuum Circuit Breaker market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

Vacuum circuit breaker is the most commonly used type of high-voltage circuit breaker, mainly divided into indoor type and outdoor type. Indoor vacuum circuit breakers are circuit breakers that are not resistant to wind, rain, snow, ice, thick frost, etc. and are suitable for installation in buildings.

UHV circuit breakers can be divided into oil circuit breakers, vacuum circuit breakers, and SF₆ (sulfur hexafluoride) circuit breakers. my country's power grid coverage continues to expand rapidly, and experience in electrical equipment R&D and production technology continues to accumulate. In recent years, the UHV industry has developed rapidly. Many factors have promoted the continuous enhancement of independent research and development capabilities of domestic enterprises in the field of UHV circuit breakers. Currently, my country's main special characteristics High-voltage circuit breaker manufacturers all have independent intellectual property rights.
