The global Indoor Vacuum Circuit Breaker market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

UHV circuit breakers can be divided into oil circuit breakers, vacuum circuit breakers, and SF6 (sulfur hexafluoride) circuit breakers. my country's power grid coverage continues to expand rapidly, and experience in electrical equipment R&D and production technology continues to accumulate. In recent years, the UHV industry has developed rapidly. Many factors have promoted the continuous enhancement of independent research and development capabilities of domestic enterprises in the field of UHV circuit breakers. Currently, my country's main special characteristics High-voltage circuit breaker manufacturers all have independent intellectual property rights. Due to high technical barriers and large initial investment scale, in my country's UHV circuit breaker market, a few companies such as Pinggao Electric, China Xidian, and Sifang Co., Ltd. occupy the majority of the market share. The market concentration is high and there are high market entry barriers.

Vacuum circuit breaker is the most commonly used type of high-voltage circuit breaker, mainly divided into indoor type and outdoor type. Indoor vacuum circuit breakers are circuit breakers that are not resistant to wind, rain, snow, ice, thick frost, etc. and are suitable for installation in buildings.
