According to our (Global Info Research) latest study, the global Industrial 2D Laser Projection Systems market size was valued at US\$ 61.36 million in 2025 and is forecast to a readjusted size of US\$ 75.33 million by 2032 with a CAGR of 3.0% during review period.

Industrial laser projection systems are devices that send out a beam of laser light that projects onto a surface an exact projected image from a 2D or 3D CAD file of information. Projection systems help manufacturers to improve efficiency and accuracy in their assembly operations, leading to higher productivity and improved product quality. Whether it's in the aerospace sector with carbon-fibre lay-ups, the timber roof, and wall truss sector, the tilt-wall concrete industry, or in general industry assembly operations, there is a laser projection system that adds value to almost any industrial assembly operation.
