SCOPE OF THE REPORT:

This report focuses on the Industrial Automation in Food and Beverage in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Most F&B manufacturers and producers are focusing on the safety and traceability of food products. The F&B industry is required to adhere to regulations and standards such as the food and drug administration (FDA) and hazard analysis critical control point (HACCP).

Industrial automation products such as MES offer effective traceability of food products by keeping a record of data and integrating field devices such as sensors and remote terminal units (RTUs) directly with the enterprise resource planning (ERP) systems. These industrial solutions are useful for manufacturers to identify faulty links in their supply lines for improving product quality.

The worldwide market for Industrial Automation in Food and Beverage is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
