Abstracts

A carousel is an automated storage and retrieval device using a series of shelving units mounted on a closed-loop track.

Carousels are one of the fastest, most efficient technologies available for picking, packing and order fulfillment operations. These high-density storage devices save space and increase productivity by bringing parts and components to the order picker or assembly worker. Carousels enhance product storage density, security, and picking throughput. We can help you specify exactly the right high-density carousel system for your operation.
