This report studies the Industrial Cartridge Valves market.

Industrial Cartridge valve is a control valve which can control stopping and opening of liquid's circulating line. It generally components of valve core, valve cover, a spring and a sealing ring. According to the installation, it can be divided into two kinds, slip-in cartridge valve and screw-in cartridge valve.

These cartridge valves are a compact design that can be used in hydraulic manifold systems for many types of industrial and mobile machinery. These products are ideal for applications which require high flow rates and leak-free control.

Scope of the Report:

This report focuses on the Industrial Cartridge Valves in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Cartridge valve downstream is wide and the main application fields are construction machinery, material handling equipment and agricultural machinery. Globally, the cartridge valve consumption market is mainly driven by growing demand for construction machinery. Construction machinery accounts for nearly 50% of total downstream consumption of cartridge valve in global.

According to the installation, it can be divided into two kinds, slip-in cartridge valve and screw-in cartridge valve. Screw-in cartridge valve is the main product, capturing about 87.93% of global consumption of cartridge valve in 2016.

According to our research and analysis, manufacturers from North America and Europe are the major leaders in the international market of cartridge valve. Europe is the largest production and consumption region. In 2016, the Europe production of cartridge valve is

13526.3 K Units and consumption is about 11067.5 K Units, accounting for about 29.37% of global consumption. Manufacturers from China are immature in technology. There is large space in the China market, as well as big gap between international brands and local brands on price.

The worldwide market for Industrial Cartridge Valves is expected to grow at a CAGR of roughly 2.3% over the next five years, will reach 39100 million US\$ in 2023, from 34100 million US\$ in 2017, according to a new GIR (Global Info Research) study.
