The global Industrial Cartridge Valves market size is expected to reach \$ 2665 million by 2032, rising at a market growth of 4.3% CAGR during the forecast period (2026-2032).

Industrial Cartridge valve is a control valve which can control stopping and opening of liquid's circulating line. It generally components of valve core, valve cover, a spring and a sealing ring. According to the installation, it can be divided into two kinds, slip-in cartridge valve and screw-in cartridge valve.

These cartridge valves are a compact design that can be used in hydraulic manifold systems for many types of industrial and mobile machinery. These products are ideal for applications which require high flow rates and leak-free control.

The major players in global industrial cartridge valves market include HydraForce, Sun, Parker, etc. The top 5 players occupy about 55% shares of the global market. North America and Europe are main markets, they occupy about 65% of the global market. Screw-in cartridge valve is the main type, with a share about 90%. Construction machinery and material handling equipment are main applications, which hold a share about 75%.
