Abstracts

Catalysts accelerate a chemical reaction by providing an alternative route with lower activation energy. This results in a higher reaction rate for the same reactant concentrations and at the given temperature compared with uncatalyzed reactions. Industrial catalysts are used extensively in industrial processes, including petroleum refining, chemical synthesis, petrochemicals and polymers, environment protection reactions, and during the production of petrochemical products.

Scope of the Report:

This report focuses on the Industrial Catalyst in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The heterogeneous catalyst are projected to be the fastest-growing type of industrial catalyst between 2018 and 2023. It is preferred by the major manufacturers owing to its characteristic of being easily separated from the products. Organometallic material is projected to register the fastest-growth among materials, followed by metals, in the market. Metal is the most preferred material used in the manufacturing of the industrial catalyst market. The demand for metals is mainly driven by to the growing application sector. Petroleum refining is the largest application segment in the market. The increase in refinery capacity and the demand for fuels have led to an increase in the use of catalyst in this application.

The Asia-Pacific region, being the largest market for industrial catalyst is also projected to register a high CAGR in the industrial catalyst market, in terms of value, between 2018 and 2023. This growth is mainly driven due to an increase in the industrial catalyst demand in various application sectors, such as petroleum refining, chemical synthesis,

and petrochemicals.

The worldwide market for Industrial Catalyst is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
