According to our (Global Info Research) latest study, the global Industrial Centrifugal Compressors market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

A centrifugal gas compressor is a type of compressor that utilizes rotating vanes or impellers to compress a gas instead of a piston. This design is used in high-end air compressors as well as on refrigeration units and air conditioners. This type of compressor is able to be used in stages to create ultra-high compression of gasses or air. This type of compressor has fewer moving parts and operates more smoothly than a piston-type compressor.
