## Abstracts

The global Industrial Centrifugal Compressors market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

A centrifugal gas compressor is a type of compressor that utilizes rotating vanes or impellers to compress a gas instead of a piston. This design is used in high-end air compressors as well as on refrigeration units and air conditioners. This type of compressor is able to be used in stages to create ultra-high compression of gasses or air. This type of compressor has fewer moving parts and operates more smoothly than a piston-type compressor.

This report studies the global Industrial Centrifugal Compressors production, demand, key manufacturers, and key regions.
