According to our (Global Info Research) latest study, the global Industrial Cloud Solution market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Cost-driven: Cloud computing has typical characteristics such as resource pooling, elastic supply, and pay-as-you-go, which can significantly reduce the cost of purchasing R&D tools for enterprises and improve their R&D efficiency. For example, cloud platforms can significantly reduce hardware costs by leasing IT hardware resources instead of directly purchasing or building them themselves; from purchasing software licenses to subscribing to cloud services based on time, people, and times, costs can also be significantly reduced. In addition, the industrial cloud platform can greatly shorten the information system construction cycle and reduce operation and maintenance costs.
