Scope of the Report:

This report focuses on the Industrial Clutches and Brakes in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

A conveyor drive system is a mechanical arrangement used for carrying goods from one location to another. An electric or mechanical drive controls the speed of the conveyor system through suitable arrangements of gear, clutch, and brake systems.

Also, it has been observed that there is a rising demand for consumer goods, especially in the food and beverage sector, this has prompted the increase in requirement for high-capacity conveyor drives for the expansion of production processes. This rising investment in the food and beverage and power sectors across the world is facilitating the rapid employment of high-capacity conveyor drives to scale up production processes. As a result of this rise in demand for high-capacity conveyor drives the global market for industrial clutches and brakes will also witness growth during the forecast period.

The worldwide market for Industrial Clutches and Brakes is expected to grow at a

CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
