The global Industrial CO2 Laser market size is expected to reach \$ 713.6 million by 2029, rising at a market growth of 4.8% CAGR during the forecast period (2023-2029).

The development trend of industrial CO2 lasers is focused on improving performance, increasing power output, and enhancing efficiency. There is a growing demand for higher power CO2 lasers in industrial applications. Manufacturers are continuously working on increasing the power output of these lasers to meet the needs of cutting, welding, and other industrial processes. Improving the beam quality of CO2 lasers is another important trend. Higher beam quality allows for better precision and accuracy in industrial applications. Manufacturers are investing in research and development to reduce beam divergence and improve beam profile. Energy efficiency is a significant concern in industrial applications. Laser manufacturers are working on developing CO2 lasers that consume less energy while maintaining high power output. This helps reduce operating costs and makes the lasers more environmentally friendly.
