Air sandblasting equipment use compressed air as power to form a high-speed radiation beam to radiate blasting materials (shot peened glass beads, steel shot, steel sand, quartz sand, emery, iron sand, sea sand) to the surface of the workpiece to be treated at high speed. Laser The cast iron platform of cutting machine laser cutting equipment changes the mechanical properties of the surface of the workpiece. Due to the impact and cutting effect of the abrasive on the surface of the workpiece, the surface of the workpiece obtains a certain degree of cleanliness and different roughness, making the surface of the workpiece The mechanical properties are improved, thus improving the fatigue resistance of the workpiece, increasing the adhesion between it and the coating, extending the durability of the coating, and also conducive to the leveling and decoration of the coating, removing impurities, normal colors and The oxide layer is removed, while roughening the surface of the medium, leaving residual stress on the surface of the base material and improving the surface hardness of the base material. Industrial Compressed Air Sandblasting Equipment refers to industrial surface-treatment equipment that uses compressed air as the power source to accelerate abrasive media, such as steel grit, aluminum oxide, glass beads or garnet, onto the surface of metal, concrete, stone or other materials. It is mainly used for rust removal, paint stripping, surface cleaning, deburring, roughening and pre-treatment before coating or painting in industries such as shipbuilding, automotive, machinery manufacturing, construction, oil & gas and metal fabrication. In 2025, global Industrial Compressed Air Sandblasting

Equipment production reached approximately 18636 units, with an average global market price of around 7,405 USD/unit. The production capacity for Industrial Compressed Air Sandblasting Equipment in 2025 was approximately 20000 units. The typical gross profit margin for Industrial Compressed Air Sandblasting Equipment between 20% and 40%.

Industrial Compressed Air Sandblasting Equipment market refers to the global market for compressed-air-driven blasting machines, blast cabinets, pressure blast pots, nozzles, dust collectors and related accessories used in industrial surface preparation and finishing. Market demand is mainly driven by infrastructure maintenance, ship repair, metal fabrication, automotive refurbishment, oil & gas pipeline protection, and the need for high-quality coating adhesion. However, the market is also influenced by environmental and worker-safety regulations, dust-control requirements, abrasive media costs and the increasing adoption of automated and enclosed blasting systems.
