## Abstracts

ICS security are used to protect industrial control systems which are operated in various fields such as electrical, oil & gas, chemical, pharmaceutical and manufacturing. This security system monitors and controls the overall industrial environment. The security system includes infrastructure which is networked with the communication technologies. Security systems monitor the events and devices by having in-built IT systems that manage the adjustments in industrial operations.

### Scope of the Report:

The driving force behind the growth in industrial control system (ICS) security market include growth in adoption of cyber security technology in order to prevent the organization and individual from threats. The ICS security identifies and prevents the attacker from acquiring control over the system. The advantage of using this system is that adopting the use of IT networks provides flexibility and scalability. The drawback of using ICS security is that if the basic network security is not handled properly then there is a possibility of attacker to acquire control over the system.

The global Industrial Control System (ICS) Security market is valued at 11300 million USD in 2017 and is expected to reach 16000 million USD by the end of 2023, growing at a CAGR of 6.0% between 2017 and 2023.

The Asia-Pacific will occupy for more market share in following years, especially in China, also fast growing India and Southeast Asia regions.
