## Abstracts

ICS security systems help power, energy, utility, and transportation resources in taking protective measures against threats such as Duqu, Flame, Night Dragon, and Stuxnet attacks. Several intelligent security solutions enable the providers to integrate, collect, and analyze the network through the data generated by their Supervisory Control and Data Acquisition (SCADA) networks and grids.

Scope of the Report:

This report studies the Industrial Control Systems Security market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Industrial Control Systems Security market by product type and applications/end industries.

ICS security is highly prone to cyber-attacks and is, at present, among the top-targeted sectors globally. Malware infections and other types of cyber-attack on systems like PLC, DCS, and SCADA can lead to invalid data sent to operations and invalid programming sent to controllers. As a result, industrial automation vendors are collaborating with IT security service providers to protect the computer-based end-points in automation systems and secure industrial customers.

The global Industrial Control Systems Security market is valued at xx million USD in 2017 and is expected to reach xx million USD by the end of 2023, growing at a CAGR of xx% between 2017 and 2023.

The Asia-Pacific will occupy for more market share in following years, especially in China, also fast growing India and Southeast Asia regions.

North America, especially The United States, will still play an important role which cannot be ignored. Any changes from United States might affect the development trend

of Industrial Control Systems Security.
