Abstracts

A control transformer is an isolation transformer that provides good voltage regulation, and is also designed to provide a high degree of secondary voltage stability (regulation) during a brief period of overload condition (also referred to as “inrush current”). Control transformers are also known as Machine Tool Transformers, Industrial Control Transformers or Control Power Transformers.

Scope of the Report:

This report focuses on the Industrial Control Transformer in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The three-phase segment dominated the market owing to better efficiency in industrial applications. Three-phase industrial compressors are used to drive a variety of general machinery such as compressors, pumps, crushers, cutting machine tools, and other mechanical equipment in petroleum, chemical, power plants, and other industrial and mining industries.

The metal & mining segment dominated the industrial control transformer market owing to increased expansion in industrialization, construction, and infrastructure activities. Asia Pacific dominated the market. The market in Asia Pacific is expected to hold the largest share of the global market till 2023. Need to reduce equipment failure caused by frequent voltage spikes are driving the market in Asia Pacific.

The worldwide market for Industrial Control Transformer is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
