According to our (Global Info Research) latest study, the global Industrial Display market size was valued at USD 4167.3 million in 2023 and is forecast to a readjusted size of USD 5248.2 million by 2030 with a CAGR of 3.3% during review period.

An industrial display is a display used in an industrial control process or device. Its main difference with the civilian or commercial display is the shell design is generally more endurable than the common display used in the civilian or commercial fields, the type of materials used to make these panels are divided into ordinary iron, stainless steel, aluminum and many others. There are also special designs, like industrial-grade LCD screen, is specifically engineered to cater to the higher environmental requirements, these industrial-grade LCD screen can tolerate a very wide temperature range, -40 to 85 Celsius degrees, only a few foreign manufacturers produce such displays, the price is, therefore more expensive. The degree of protection of industrial displays is indicated by IP **, the first one being the dust-proof rating and the second being the waterproof rating. Dustproof rating up to 6, waterproof up to 8.

The LCD technology accounted for the largest share of the overall industrial display market in 2017. Products such flat-panel displays, desktop monitors, industrial PCs, and some video walls are using LCD technology. This is responsible for driving the this market.
