The global Industrial Distribution Box market size is expected to reach \$ million by 2030, rising at a market growth of % CAGR during the forecast period (2024-2030).

An Industrial Distribution Box, also known as a Power Distribution Box or Power Distribution Panel, is a type of electrical enclosure used in industrial settings to distribute power from a power source to various electrical loads and equipment. These boxes are designed to organize and protect electrical components such as circuit breakers, fuses, contactors, and terminals within a rugged and durable enclosure. Industrial distribution boxes are commonly used in factories, construction sites, events, and other industrial applications where temporary or permanent power distribution is required. They can distribute power to multiple outlets, machines, tools, and equipment safely and efficiently. Some industrial distribution boxes may also include overload protection, surge protection, ground fault protection, and other safety features to protect both the equipment and personnel from electrical hazards.
