Abstracts

Industrial dryers are used to reduce moisture efficiently from large quantities of bulk materials. The principle involved in drying is the drawing of moisture from the interior of individual particles to the surface. This moisture on the surface is then evaporated. Industrial dryers are constructed depending on the type and quantity of material to be processed.

According to our (Global Info Research) latest study, the global Industrial Dryers market size was valued at USD 5147.3 million in 2022 and is forecast to a readjusted size of USD 6440.5 million by 2029 with a CAGR of 3.3% during review period.
