Industrial Emissions Analyzer is a device to analyze the single/multiple gas or solid pollutants in ambient air. Many manufacturing processes emit pollutants that may accumulate in the atmosphere or on land and water. Air pollutants are frequently monitored in environmental stations that may be housed in temporary or permanent structures strategically located throughout a region. These stations are equipped with gas analyzers and particulate samplers.

Excessive environment pollution has become a global problem, and the enactment of various environmental protection policies and regulations promulgated by the state, local governments at all levels have been pay more attention to environmental management in their jurisdictions, and increase investment in environmental monitoring and emergency monitoring, so the demand of Industrial Emissions Analyzer is increasing.
