Industrial Equipment Rental Software is a software platform used to manage industrial equipment rental operations, including asset tracking, scheduling, contract management, maintenance planning, billing, and utilization monitoring. It is widely used by industrial equipment leasing companies and fleet operators. The product boundary excludes ERP software, construction project management software, and general accounting systems.

The upstream segment includes cloud infrastructure, databases, cybersecurity solutions, and software development tools. Midstream vendors provide software development, deployment, integration, and maintenance services. Downstream users include industrial equipment rental companies, service providers, manufacturers, and industrial asset operators.

Industrial equipment rental software manages equipment inventory, leasing schedules, maintenance logs and billing for construction and mining machinery rental companies. It realizes digital asset control and reduces manual management costs. The light-asset operation trend of engineering enterprises boosts market demand. The software will

integrate IoT real-time equipment monitoring and intelligent risk warning modules.
