## Abstracts

The global Industrial Floor Epoxy Coatings market size is expected to reach \$ million by 2030, rising at a market growth of % CAGR during the forecast period (2024-2030).

**Wear resistance, impact resistance, pressure resistance:** Industrial floors are often operated by heavy equipment, forklifts, trucks, etc. The wear resistance and impact resistance of epoxy coatings can well resist the wear and impact of these heavy equipment. **Good anti-slip performance:** The surface of epoxy coating is relatively smooth and has a high friction coefficient, which can effectively reduce the risk of slipping. **Easy to clean:** The surface of epoxy coating is not easy to accumulate dust, making it easier to clean and keeping the floor clean and tidy. **Long service life:** Epoxy coatings have excellent corrosion resistance and chemical resistance, and have a long service life, reducing the cost and trouble of frequent replacement of floor coatings.

This report studies the global Industrial Floor Epoxy Coatings production, demand, key manufacturers, and key regions.
