According to our (Global Info Research) latest study, the global Industrial Generator Set market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Industrial Generator Set is a complete set of mechanical equipment that converts other forms of energy into electrical energy. It consists of a power system, a control system, a noise reduction system, a damping system, and an exhaust system. It is driven by a water turbine, a steam turbine, a diesel engine, or other power machinery. The energy generated by water flow, air flow, fuel combustion or nuclear fission is converted into mechanical energy and transmitted to the generator, which is then converted into electrical energy by the generator and output to the electrical equipment.
