Dicapryl Phthalate (DCP) is a high-performance industrial-grade plasticizer known for its excellent heat resistance, light stability, weatherability, and electrical insulation properties. Although its plasticizing efficiency is slightly lower than that of DOP, DCP offers superior compatibility and stable viscosity, making it especially suitable for plastisol applications. It is widely used as a substitute for DOP in products such as cable compounds, adhesive tapes, and vinyl flooring, where enhanced weather resistance and insulation are required.
