According to our (Global Info Research) latest study, the global Industrial-Grade Infrared Thermometer market size was valued at US\$ 247 million in 2025 and is forecast to a readjusted size of US\$ 349 million by 2032 with a CAGR of 5.1% during review period.

In 2025, the global production of industrial-grade infrared thermometers reached 1.5299 million units, with an average selling price of US\$157 per unit. The global annual production capacity of industrial-grade infrared thermometers is approximately 2 million units, with a gross profit margin of approximately 23.2%. An industrial-grade infrared thermometer is a non-contact temperature measurement device specifically designed for industrial environments. It quickly and accurately measures the surface temperature of an object by detecting the infrared radiation emitted by the target object, without direct contact. This instrument is widely used in various complex and high-risk industrial scenarios, helping to achieve remote temperature monitoring and control. The upstream of the industrial-grade infrared thermometer industry chain includes infrared detection elements and sensors, optical and window components, probes and thermal imaging module structural components, etc.; the midstream consists of industrial-grade infrared thermometer manufacturers; and the downstream mainly includes industries such as machinery, chemical, and metallurgy.

The industrial-grade infrared thermometer market is in a phase of steady expansion, driven by the continued demand for non-contact, rapid, and accurate temperature monitoring from industries such as industrial automation, quality control, energy, and metallurgy. High-quality models are upgrading towards higher resolution, faster response, wider operating temperature ranges, and higher protection levels, while

integration, cloud-based data analysis, and remote diagnostics are becoming major trends. Regional markets differ; mature markets emphasize compliance and data security, while emerging markets focus on cost-effectiveness, localized services, and rapid deployment.
