Industrial Grade Sodium Laureth Sulfate (SLES) is a widely used anionic surfactant known for its excellent cleaning, emulsifying, and foaming properties. Produced by ethoxylating lauryl alcohol followed by sulfation and neutralization, SLES is typically available as a 30% to 70% aqueous solution. It finds extensive applications in personal care products (such as shampoos, body washes, and toothpastes), household cleaning agents (like dishwashing liquids and laundry detergents), and industrial cleaners (including metal and automotive cleaning solutions). Compared to other surfactants, SLES offers lower skin irritation and good biodegradability, making it suitable for large-scale production and various formulation systems.
