Abstracts

The global Industrial Hook and Loop Products market size is expected to reach \$ 3621.4 million by 2030, rising at a market growth of 4.5% CAGR during the forecast period (2024-2030).

Asia-Pacific is the fastest growing market.

Industrial Hook and Loop Fasteners, also known as Velcro (Hook and Loop) consists of two components: typically, two lineal fabric strips (or, alternatively, round 'dots' or squares) which are attached (sewn or otherwise adhered) to the opposing surfaces to be fastened. The first component features tiny hooks, the second features smaller loops. When the two are pressed together the hooks catch in the loops and the two pieces fasten or bind temporarily. When separated, by pulling or peeling the two surfaces apart, the strips make a distinctive 'ripping' sound.
