## Abstracts

According to our (Global Info Research) latest study, the global Industrial Anti-scaling Chemicals market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Anti-scaling chemicals are surface active materials that dislodges scaling salts by interfering the precipitation reactions. Anti-scaling chemicals have the property to distort crystal shapes of scaling salts resulting in soft non adherent scales. Anti-scaling chemicals adsorb crystals or colloidal particles and impart a high anionic charge that tends to prevent crystal formation.

These chemicals are used in various industries for membrane & thermal desalination, municipal wastewater treatment, cooling & heating application, sugar evaporation, and detergents & cleansing products.
