Industrial joysticks are widely used to control machines, assembly lines, and vehicles.

Scope of the Report:

This report focuses on the Industrial Joysticks in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. One of the salient features of industrial joysticks market is the cooperation with downstream manufactures in heavy machines, assembly lines, vehicles and etc., especially for large companies in these industries.

Geographically, the consumption market is leading by Europe and United States. In terms of year 2017, Europe holds the largest market share, with about 160.35 Million USD consumption revenue, followed by United States, with about 33.51% market share in 2017. China and Japan will keep playing important role in Global market. Europe and United States will keep to be the major revenue contributor to the industrial joystick market throughout the forecast period. The rising industrial and economic development along with the growth in the number of companies planning to integrate the industrial joystick technology will drive the growth of the market.

Curtiss-Wright and APEM are the top two players in Industrial joysticks market, with about 12.59% and 10.98% market share separately in 2017. Other prominent vendors in industrial joysticks market include Bosch Rexroth, Spohn & Burkhardt, Kawasaki Precision Machinery, RAFI GmbH & Co. KG, Schneider Electric, Danfoss, W.

Gessmann and etc. Many local and regional vendors offer high-tech, highly customized products at lesser prices than international vendors. Due to this, though new vendors are entering the market, they are finding it increasingly difficult to compete with present vendors based on quality, features, functionalities, and services. The competitive environment is likely to increase due to rise in product extensions, technological advancements, and growth in M&A activities.

The worldwide market for Industrial Joysticks is expected to grow at a CAGR of roughly 4.6% over the next five years, will reach 510 million US\$ in 2023, from 390 million US\$ in 2017, according to a new GIR (Global Info Research) study.
