## Abstracts

According to our (Global Info Research) latest study, the global Industrial Laser Projection System market size was valued at USD 192.4 million in 2023 and is forecast to a readjusted size of USD 253.5 million by 2030 with a CAGR of 4.0% during review period.

Industrial laser projection systems are devices that send out a beam of laser light that projects onto a surface an exact projected image from a 2D or 3D CAD file of information. Projection systems help manufacturers to improve efficiency and accuracy in their assembly operations, leading to higher productivity and improved product quality. Whether it's in the aerospace sector with carbon-fibre lay-ups, the timber roof, and wall truss sector, the tilt-wall concrete industry, or in general industry assembly operations, there is a laser projection system that adds value to almost any industrial assembly operation.

The key global manufacturers of industrial laser projection systems are Virtek, Faro Technologies, LAP GmbH, EXTEND3D, SI-laser, etc. The top three manufacturers occupy about 50% of the market share, among which the largest manufacturer is Virtek. Global industrial laser projection systems production regions are mainly located in North America, Europe, Japan, China, etc. In terms of product categories, 3D systems have a higher market share of more than 70%, while 2D systems have a lower share. In terms of applications, industrial laser projection systems are mainly used in the aerospace, automotive and construction sectors, with the aerospace sector accounting for the highest market share of 35.53%, while the architecture is growing faster with a CAGR of 5.77%.
