Abstracts

The global Industrial Laser Projection System market size is expected to reach $ 253.5 million by 2029, rising at a market growth of 4.0% CAGR during the forecast period (2023-2029).

The key global manufacturers of industrial laser projection systems are Virtek, Faro Technologies, LAP GmbH, EXTEND3D, Sl-laser, etc. The top three manufacturers occupy about 50% of the market share, among which the largest manufacturer is Virtek. Global industrial laser projection systems production regions are mainly located in North America, Europe, Japan, China, etc. In terms of product categories, 3D systems have a higher market share of more than 70%, while 2D systems have a lower share. In terms of applications, industrial laser projection systems are mainly used in the aerospace, automotive and construction sectors, with the aerospace sector accounting for the highest market share of 35.53%, while the architecture is growing faster with a CAGR of 5.77%.

Industrial laser projection systems are devices that send out a beam of laser light that projects onto a surface an exact projected image from a 2D or 3D CAD file of information. Projection systems help manufacturers to improve efficiency and accuracy in their assembly operations, leading to higher productivity and improved product quality. Whether it’s in the aerospace sector with carbon-fibre lay-ups, the timber roof, and wall truss sector, the tilt-wall concrete industry, or in general industry assembly operations, there is a laser projection system that adds value to almost any industrial assembly operation.

This report studies the global Industrial Laser Projection System production, demand, key manufacturers, and key regions.
