Scope of the Report:

This report focuses on the Industrial Lighting in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The factory and production lines application held a larger share of the industrial lighting market in 2017. Factory and production lines are upgrading to critical lighting solutions, such as LEDs and connected lighting solution, to receive an immediate payback on their investment through improved light quality and control. The factory and production lines is the largest application area for industrial lighting solutions. The variety of work performed in the industry can vary tremendously from production to machining. Therefore, every lighting solution needs to be customized according to the available space and the complexity of the task being performed. Asia Pacific (APAC) dominates the industrial lighting market; however, RoW is expected to grow at the highest rate during the forecast period. The countries in the RoW region are likely to witness an extensive growth in infrastructural building projects. Therefore, the industrial lighting market in this region is expected to exhibit a high growth. The worldwide market for Industrial Lighting is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
