According to our (Global Info Research) latest study, the global Industrial LoRa Modems market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

An industrial LoRa (Long-Range) modem is a communication device designed for industrial and commercial applications that utilize the LoRaWAN (Long-Range Wide Area Network) protocol. LoRa technology is known for its long-range, low-power capabilities, making it suitable for various IoT (Internet of Things) and M2M (Machine-to-Machine) applications where reliable, low-power, long-range communication is essential. Industrial LoRa modems act as gateways, bridges, or modems to connect devices and sensors to a LoRaWAN network.

The Global Mobile Economy Development Report 2023 released by GSMA Intelligence pointed out that by the end of 2022, the number of global mobile users would exceed 5.4 billion. The mobile ecosystem supports 16 million jobs directly and 12 million jobs indirectly.

According to our Communications Research Centre, in 2022, the global communication equipment was valued at US\$ 100 billion. The U.S. and China are powerhouses in the manufacture of communications equipment. According to data from the Ministry of Industry and Information Technology of China, the cumulative revenue of telecommunications services in 2022 was ?1.58 trillion, an increase of 8% over the previous year. The total amount of telecommunications business calculated at the price of the previous year reached ?1.75 trillion, a year-on-year increase of 21.3%. In the same year, the fixed Internet broadband access business revenue was ?240.2 billion,

an increase of 7.1% over the previous year, and its proportion in the telecommunications business revenue decreased from 15.3% in the previous year to 15.2%, driving the telecommunications business revenue to increase by 1.1 percentage points.
