The global Industrial and Institutional (I & I) Cleaners market size is expected to reach \$ 50860 million by 2032, rising at a market growth of 3.4% CAGR during the forecast period (2026-2032).

Industrial and Institutional (I&I) cleaning generally refers to the removal of visible dirt, soil and grease from a surface, it is available in various forms such as liquid concentrates that need to be diluted, ready-to-use liquids, powders and blocks. As their role is to facilitate safety, they are ubiquitous and used in all industrial and institutional organizations. The end-use segments are industrial cleaning, food & beverage, building service, commercial laundry, vehicle cleaning, healthcare facilities, and others.

The Industrial and Institutional (I&I) Cleaners market is driven by several factors related to the growing demand for cleanliness, hygiene, and efficient cleaning solutions across industries and institutions. These cleaners are used in commercial, industrial, and institutional settings like factories, hospitals, schools, hotels, restaurants, and more.

With increasing awareness of the importance of hygiene in preventing the spread of diseases (including infectious diseases like COVID-19), there's a growing demand for industrial-strength cleaning products in hospitals, schools, offices, and other public spaces.

The need for proper sanitation in food processing and food service industries to prevent contamination and comply with health regulations (e.g., HACCP standards) drives the demand for specialized industrial cleaners.

Clean environments are necessary in industries like manufacturing, pharmaceuticals,

and electronics to maintain worker safety and productivity, further propelling cleaner demand.

Stringent hygiene standards in food processing plants, bakeries, and other food production facilities require powerful, safe cleaning solutions. I&I cleaners help meet these standards by providing effective cleaning and sanitation of surfaces and equipment.

The restaurant and hospitality industry also drives the demand for I&I cleaners to maintain cleanliness and hygiene in kitchens, dining areas, and common spaces.

The increasing number of manufacturing plants, warehouses, distribution centers, and other industrial facilities necessitates the use of heavy-duty cleaning products to maintain machinery, floors, and work areas. Industries like automotive, chemicals, textiles, and pharmaceuticals all rely on I&I cleaners.

The ongoing growth in construction and the renovation of commercial properties (e.g., malls, office buildings) also fuels demand for industrial-grade cleaners to deal with dust, debris, and tough stains left by the building process.
