Abstracts

The global Industrial Nylon Brush Roller market size is expected to reach \$ 140 million by 2032, rising at a market growth of 5.7% CAGR during the forecast period (2026-2032).

In 2025, global production of industrial nylon brush rollers reached 1.63 million meters, with an estimated average selling price of \$57 per meter. Industrial nylon brush rollers are cylindrical rotating brush-like industrial components made with metal shafts, aluminum alloy cylinders, PVC/PP/nylon plastic cores, wood cores, or composite material roller cores as the base material, and nylon bristles such as PA6, PA66, PA610, and PA612 as the main bristle material. They are manufactured through processes such as bristle planting, winding, steel strip clamping, pressing, sleeve assembly, or spiral winding. They are mainly used in equipment production lines for cleaning, dust removal, auxiliary conveying, dewatering, light deburring, polishing, surface treatment, fruit and vegetable cleaning, glass cleaning, PCB cleaning, photovoltaic glass cleaning, woodworking sanding, textile printing and dyeing, and packaging conveying. Nylon brush rollers have better flexibility, cause less damage to the workpiece surface, and have a better balance of wear resistance and chemical resistance, making them suitable for medium to low intensity cleaning and non-metallic contact scenarios. The upstream mainly includes caprolactam/nylon resin, PA6/PA66 brush filaments, modified nylon, abrasive filaments, conductive masterbatch, flame retardant masterbatch, aluminum alloy profiles, steel shafts, plastic roller cores, adhesives, and machined parts; the midstream involves brush filament extrusion or procurement, roller core processing, bristle implantation/winding/assembly, dynamic balancing testing, dimensional calibration, and customized adaptation; the downstream targets industrial equipment manufacturers, glass/photovoltaic/PCB/food/woodworking/textile equipment manufacturers, MRO

industrial consumables channels, end-user factories, and equipment maintenance service providers. Gross profit margins range from approximately 20% to 40%.
