A Public Address & General Alarm System (PAGA) is an electronic sound amplification and distribution system with a microphone, amplifier and loudspeakers, used to allow a person to address a large public, for example for announcements of movements at large and noisy air and rail terminals or at a sports stadium. Some PAGA systems have speakers that cover an entire campus of a college or industrial site, or an entire outdoor complex (e.g., an athletic stadium). A large PA system may also be used as an alert system during an emergency.

SCOPE OF THE REPORT:

This report studies the Industrial PA/GA systems market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Industrial PA/GA systems market by product type and applications/end industries.

Asia-Pacific is poised to grow at the highest CAGR during the forecast period owing to rising safety awareness, increasing disposable income in this region, and rising focus of prominent players on the APAC market increasing product availability.

The product average price declined in the past few years due to the technology development, the average price will keep this trend in the few future years due to increasing mature manufacturing technology and lowering cost of raw materials. Strong market competition is resulting in annual 1-2 percent price erosion.
