The global Industrial Pneumatic Pump market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Industrial pneumatic pumps are pumps driven by gas pressure and are mainly used for transportation, pressurization, discharge and pumping in the industrial field. They are generally more reliable, energy efficient and safer than traditional electric pumps because they require no electricity or wires and can be used in hazardous or flammable environments. Pneumatic pumps can also handle high-viscosity, corrosive and high-temperature liquids, making them widely used in industries such as chemical, petroleum, pharmaceutical and food processing.
