The global Industrial PTC Heaters market size is expected to reach \$ 1729 million by 2032, rising at a market growth of 7.1% CAGR during the forecast period (2026-2032).

In 2025, global Industrial PTC Heaters production reached approximately 24.76 million units, with an average global market price of around USD 42 per unit.

The gross profit margin of major companies in the industry is between 21.64%-36.87%.

In 2025, the global production capacity of Industrial PTC Heaters was approximately 32.58 million units.

Industrial PTC Heaters are self-regulating heating components or assemblies based on positive temperature coefficient ceramic materials. Their electrical resistance rises rapidly with temperature, enabling safer temperature control and reducing overheating risk compared with conventional resistance heaters. The product scope includes PTC air heaters, liquid heaters, cabinet heaters, dehumidification heaters and thermal management modules for industrial equipment. They are used in control cabinets, battery systems, HVAC equipment, rail transit, industrial dryers, vending machines, automation equipment and environmental control systems. The market excludes household-only small heaters and non-PTC resistance heating elements.

The industry chain includes barium titanate ceramic powders, electrodes, aluminum fins, insulating materials, thermal protectors, housings, wires and control components. Midstream production covers ceramic chip sintering, electrode coating, module assembly, thermal design, electrical testing and safety certification. Downstream users include industrial equipment manufacturers, energy storage systems, HVAC equipment,

transportation systems, automation lines, control cabinets and environmental appliances. Demand is supported by electrification, compact thermal management, equipment safety requirements and growth in industrial automation and battery-related applications.

Industrial pipeline heating, drying production lines and constant-temperature equipment manufacturing boost demand for industrial PTC heaters. Automatic constant-temperature characteristic avoids overheating risk and cuts energy waste. Compact modular design facilitates on-site installation and equipment integration.

This report studies the global Industrial PTC Heaters production, demand, key manufacturers, and key regions.
