Abstracts

The global Industrial Radioactive Sources market size is expected to reach \$ 763 million by 2032, rising at a market growth of 5.0% CAGR during the forecast period (2026-2032).

An Industrial Radioactive Source refers to a quantity of radioactive material specifically engineered and used within industrial sectors to harness ionizing radiation for processes such as imaging, gauging, tracing, or sterilization. These sources are characterized by their high reliability and are designed to operate in rugged environments, such as construction sites, oil refineries, and manufacturing plants. Technically, these sources are typically classified as Sealed Sources, where the radionuclide (such as Iridium-192 or Cobalt-60) is double-encapsulated in high-grade metal to eliminate the risk of chemical contamination while providing a stable beam of radiation. In Industrial Radiography, powerful gamma sources act like 'industrial X-rays' to peer through thick steel components. In Process Control, sources are used in density and level gauges where sensors cannot make physical contact with extreme temperatures or corrosive chemicals. Furthermore, Unsealed Sources are occasionally used as Radiotracers to detect hidden leaks in underground pipelines or to study the flow dynamics within chemical reactors.

Industrial Radioactive Sources refer to radioactive materials primarily used in industrial applications such as inspection, measurement, processing control, irradiation, and equipment calibration, rather than in medical or consumer contexts. Common isotopes used in industrial sources include cobalt-60, iridium-192, cesium-137, strontium-90, and americium-241. These sources form a critical foundation for the industrial application of nuclear technology, enabling non-destructive testing (NDT), continuous process measurement, and quality assurance across a wide range of heavy industries. Compared with medical radioactive sources, industrial sources are designed to operate reliably under harsh conditions, emphasizing durability, stability, and long-term

performance.

From a demand perspective, non-destructive testing remains the largest and most stable application segment for industrial radioactive sources. Industries such as oil and gas, petrochemicals, power generation, shipbuilding, aerospace, and heavy equipment manufacturing rely heavily on gamma radiography to inspect welds, castings, pipelines, and pressure vessels. Industrial radioactive sources offer superior penetration capabilities for thick or dense materials and can function effectively in environments where alternative technologies may be constrained by access, geometry, or operating conditions. As aging infrastructure, energy facilities, and industrial assets require more frequent inspection and maintenance, demand for industrial radioactive sources in safety-critical inspections remains resilient and structurally stable.

Industrial process control is another core application area. Radioactive-source-based gauges for density, level, thickness, and moisture measurement are widely deployed in steel mills, cement plants, paper manufacturing, chemical processing, and mining operations. These instruments provide non-contact, real-time measurements that are unaffected by extreme temperatures, high pressure, dust, or corrosive environments. As industries continue to pursue higher levels of automation, efficiency, and consistency, industrial radioactive sources remain a reliable solution at the sensor level, supporting digitalized and continuous production systems.

On the supply side, the industrial radioactive source market is shaped by stringent regulatory oversight and high barriers to entry. Governments worldwide impose strict controls on the production, transportation, licensing, use, storage, recovery, and disposal of radioactive sources. International Atomic Energy Agency (IAEA) safety standards serve as a global benchmark, influencing national regulations and compliance requirements. While such regulation increases operational and compliance costs, it also limits competition and strengthens the market position of established suppliers with proven safety records, technical expertise, and comprehensive lifecycle management capabilities. For industrial end users, supplier credibility, regulatory compliance, and long-term service support are often as critical as product performance. Looking ahead, the industrial radioactive source market is expected to follow a path of stable demand coexisting with gradual technological substitution. In some routine or lower-risk applications, non-radioactive alternatives such as X-ray, laser, or ultrasonic technologies are increasingly viable and may reduce reliance on radioactive sources. However, in applications requiring deep penetration, long-term stability, and reliable performance under extreme operating conditions, industrial radioactive sources continue to demonstrate clear advantages. Future competition will increasingly focus on enhanced safety design, precise dose control, digital tracking systems, and integrated end-of-life management services. Overall, the industrial radioactive source market represents a mature but strategically essential segment with predictable demand,

playing a vital role in global industrial safety, quality control, and infrastructure integrity. This report studies the global Industrial Radioactive Sources demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Industrial Radioactive Sources, and provides market size (US\$ million) and Year-over-Year (YoY) growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Industrial Radioactive Sources that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Industrial Radioactive Sources total market, 2021-2032, (USD Million)

Global Industrial Radioactive Sources total market by region & country, CAGR, 2021-2032, (USD Million)

U.S. VS China: Industrial Radioactive Sources total market, key domestic companies, and share, (USD Million)

Global Industrial Radioactive Sources revenue by player, revenue and market share 2021-2026, (USD Million)

Global Industrial Radioactive Sources total market by Type, CAGR, 2021-2032, (USD Million)

Global Industrial Radioactive Sources total market by Application, CAGR, 2021-2032, (USD Million)

This report profiles major players in the global Industrial Radioactive Sources market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Nordion, Rosatom, China Isotope & Radiation Corporation, Eckert & Ziegler Strahlen, Polatom, Board of Radiation and Isotope Technology (BRIT), DIOXITEK, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the world Industrial Radioactive Sources market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US\$ Millions), by player, by regions, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.

Global Industrial Radioactive Sources Market, By Region:

United States

China

Europe

Japan

South Korea

ASEAN

India

Rest of World

Global Industrial Radioactive Sources Market, Segmentation by Type:

Co-60

Ir-192

Cs-137

Se-75

Others

Global Industrial Radioactive Sources Market, Segmentation by Physical Form:

Sealed Sources

Unsealed Sources

Global Industrial Radioactive Sources Market, Segmentation by Radiation Emitted:

Alpha Source

Beta Source

Global Industrial Radioactive Sources Market, Segmentation by Application:

Irradiate

Flaw Detection

Others

Companies Profiled:

Nordion

Rosatom

China Isotope & Radiation Corporation

Eckert & Ziegler Strahlen

Polatom

Board of Radiation and Isotope Technology (BRIT)

DIOXITEK

Key Questions Answered

1. How big is the global Industrial Radioactive Sources market?
2. What is the demand of the global Industrial Radioactive Sources market?
3. What is the year over year growth of the global Industrial Radioactive Sources market?
4. What is the total value of the global Industrial Radioactive Sources market?
5. Who are the Major Players in the global Industrial Radioactive Sources market?
6. What are the growth factors driving the market demand?

Contents

1 SUPPLY SUMMARY

- 1.1 Industrial Radioactive Sources Introduction
- 1.2 World Industrial Radioactive Sources Market Size & Forecast (2021 & 2025 & 2032)
- 1.3 World Industrial Radioactive Sources Total Market by Region (by Headquarter Location)
 - 1.3.1 World Industrial Radioactive Sources Market Size by Region (2021-2032), (by Headquarter Location)
 - 1.3.2 United States Based Company Industrial Radioactive Sources Revenue (2021-2032)
 - 1.3.3 China Based Company Industrial Radioactive Sources Revenue (2021-2032)
 - 1.3.4 Europe Based Company Industrial Radioactive Sources Revenue (2021-2032)
 - 1.3.5 Japan Based Company Industrial Radioactive Sources Revenue (2021-2032)
 - 1.3.6 South Korea Based Company Industrial Radioactive Sources Revenue (2021-2032)
 - 1.3.7 ASEAN Based Company Industrial Radioactive Sources Revenue (2021-2032)
 - 1.3.8 India Based Company Industrial Radioactive Sources Revenue (2021-2032)
- 1.4 Market Drivers, Restraints and Trends
 - 1.4.1 Industrial Radioactive Sources Market Drivers
 - 1.4.2 Factors Affecting Demand
 - 1.4.3 Major Market Trends

2 DEMAND SUMMARY

- 2.1 World Industrial Radioactive Sources Consumption Value (2021-2032)
- 2.2 World Industrial Radioactive Sources Consumption Value by Region
 - 2.2.1 World Industrial Radioactive Sources Consumption Value by Region (2021-2026)
 - 2.2.2 World Industrial Radioactive Sources Consumption Value Forecast by Region (2027-2032)
- 2.3 United States Industrial Radioactive Sources Consumption Value (2021-2032)
- 2.4 China Industrial Radioactive Sources Consumption Value (2021-2032)
- 2.5 Europe Industrial Radioactive Sources Consumption Value (2021-2032)
- 2.6 Japan Industrial Radioactive Sources Consumption Value (2021-2032)
- 2.7 South Korea Industrial Radioactive Sources Consumption Value (2021-2032)
- 2.8 ASEAN Industrial Radioactive Sources Consumption Value (2021-2032)
- 2.9 India Industrial Radioactive Sources Consumption Value (2021-2032)

3 WORLD INDUSTRIAL RADIOACTIVE SOURCES COMPANIES COMPETITIVE ANALYSIS

- 3.1 World Industrial Radioactive Sources Revenue by Player (2021-2026)
- 3.2 Industry Rank and Concentration Rate (CR)
 - 3.2.1 Global Industrial Radioactive Sources Industry Rank of Major Players
 - 3.2.2 Global Concentration Ratios (CR4) for Industrial Radioactive Sources in 2025
 - 3.2.3 Global Concentration Ratios (CR8) for Industrial Radioactive Sources in 2025
- 3.3 Industrial Radioactive Sources Company Evaluation Quadrant
- 3.4 Industrial Radioactive Sources Market: Overall Company Footprint Analysis
 - 3.4.1 Industrial Radioactive Sources Market: Region Footprint
 - 3.4.2 Industrial Radioactive Sources Market: Company Product Type Footprint
 - 3.4.3 Industrial Radioactive Sources Market: Company Product Application Footprint
- 3.5 Competitive Environment
 - 3.5.1 Historical Structure of the Industry
 - 3.5.2 Barriers of Market Entry
 - 3.5.3 Factors of Competition
- 3.6 Mergers & Acquisitions Activity

4 UNITED STATES VS CHINA VS REST OF WORLD (BY HEADQUARTER LOCATION)

- 4.1 United States VS China: Industrial Radioactive Sources Revenue Comparison (by Headquarter Location)
 - 4.1.1 United States VS China: Industrial Radioactive Sources Revenue Comparison (2021 & 2025 & 2032) (by Headquarter Location)
 - 4.1.2 United States VS China: Industrial Radioactive Sources Revenue Market Share Comparison (2021 & 2025 & 2032)
- 4.2 United States Based Companies VS China Based Companies: Industrial Radioactive Sources Consumption Value Comparison
 - 4.2.1 United States VS China: Industrial Radioactive Sources Consumption Value Comparison (2021 & 2025 & 2032)
 - 4.2.2 United States VS China: Industrial Radioactive Sources Consumption Value Market Share Comparison (2021 & 2025 & 2032)
- 4.3 United States Based Industrial Radioactive Sources Companies and Market Share, 2021-2026
 - 4.3.1 United States Based Industrial Radioactive Sources Companies, Headquarters (States, Country)
 - 4.3.2 United States Based Companies Industrial Radioactive Sources Revenue,

(2021-2026)

4.4 China Based Companies Industrial Radioactive Sources Revenue and Market Share, 2021-2026

4.4.1 China Based Industrial Radioactive Sources Companies, Company Headquarters (Province, Country)

4.4.2 China Based Companies Industrial Radioactive Sources Revenue, (2021-2026)

4.5 Rest of World Based Industrial Radioactive Sources Companies and Market Share, 2021-2026

4.5.1 Rest of World Based Industrial Radioactive Sources Companies, Headquarters (Province, Country)

4.5.2 Rest of World Based Companies Industrial Radioactive Sources Revenue (2021-2026)

5 MARKET ANALYSIS BY TYPE

5.1 World Industrial Radioactive Sources Market Size Overview by Type: 2021 VS 2025 VS 2032

5.2 Segment Introduction by Type

5.2.1 Co-60

5.2.2 Ir-192

5.2.3 Cs-137

5.2.4 Se-75

5.2.5 Others

5.3 Market Segment by Type

5.3.1 World Industrial Radioactive Sources Market Size by Type (2021-2026)

5.3.2 World Industrial Radioactive Sources Market Size by Type (2027-2032)

5.3.3 World Industrial Radioactive Sources Market Size Market Share by Type (2027-2032)

6 MARKET ANALYSIS BY PHYSICAL FORM

6.1 World Industrial Radioactive Sources Market Size Overview by Physical Form: 2021 VS 2025 VS 2032

6.2 Segment Introduction by Physical Form

6.2.1 Sealed Sources

6.2.2 Unsealed Sources

6.3 Market Segment by Physical Form

6.3.1 World Industrial Radioactive Sources Market Size by Physical Form (2021-2026)

6.3.2 World Industrial Radioactive Sources Market Size by Physical Form (2027-2032)

6.3.3 World Industrial Radioactive Sources Market Size Market Share by Physical Form (2027-2032)

7 MARKET ANALYSIS BY RADIATION EMITTED

7.1 World Industrial Radioactive Sources Market Size Overview by Radiation Emitted: 2021 VS 2025 VS 2032

7.2 Segment Introduction by Radiation Emitted

7.2.1 Alpha Source

7.2.2 Beta Source

7.3 Market Segment by Radiation Emitted

7.3.1 World Industrial Radioactive Sources Market Size by Radiation Emitted (2021-2026)

7.3.2 World Industrial Radioactive Sources Market Size by Radiation Emitted (2027-2032)

7.3.3 World Industrial Radioactive Sources Market Size Market Share by Radiation Emitted (2027-2032)

8 MARKET ANALYSIS BY APPLICATION

8.1 World Industrial Radioactive Sources Market Size Overview by Application: 2021 VS 2025 VS 2032

8.2 Segment Introduction by Application

8.2.1 Irradiate

8.2.2 Flaw Detection

8.2.3 Others

8.3 Market Segment by Application

8.3.1 World Industrial Radioactive Sources Market Size by Application (2021-2026)

8.3.2 World Industrial Radioactive Sources Market Size by Application (2027-2032)

8.3.3 World Industrial Radioactive Sources Market Size Market Share by Application (2021-2032)

9 COMPANY PROFILES

9.1 Nordion

9.1.1 Nordion Details

9.1.2 Nordion Major Business

9.1.3 Nordion Industrial Radioactive Sources Product and Services

9.1.4 Nordion Industrial Radioactive Sources Revenue, Gross Margin and Market

Share (2021-2026)

9.1.5 Nordion Recent Developments/Updates

9.1.6 Nordion Competitive Strengths & Weaknesses

9.2 Rosatom

9.2.1 Rosatom Details

9.2.2 Rosatom Major Business

9.2.3 Rosatom Industrial Radioactive Sources Product and Services

9.2.4 Rosatom Industrial Radioactive Sources Revenue, Gross Margin and Market

Share (2021-2026)

9.2.5 Rosatom Recent Developments/Updates

9.2.6 Rosatom Competitive Strengths & Weaknesses

9.3 China Isotope & Radiation Corporation

9.3.1 China Isotope & Radiation Corporation Details

9.3.2 China Isotope & Radiation Corporation Major Business

9.3.3 China Isotope & Radiation Corporation Industrial Radioactive Sources Product and Services

9.3.4 China Isotope & Radiation Corporation Industrial Radioactive Sources Revenue, Gross Margin and Market Share (2021-2026)

9.3.5 China Isotope & Radiation Corporation Recent Developments/Updates

9.3.6 China Isotope & Radiation Corporation Competitive Strengths & Weaknesses

9.4 Eckert & Ziegler Strahlen

9.4.1 Eckert & Ziegler Strahlen Details

9.4.2 Eckert & Ziegler Strahlen Major Business

9.4.3 Eckert & Ziegler Strahlen Industrial Radioactive Sources Product and Services

9.4.4 Eckert & Ziegler Strahlen Industrial Radioactive Sources Revenue, Gross Margin and Market Share (2021-2026)

9.4.5 Eckert & Ziegler Strahlen Recent Developments/Updates

9.4.6 Eckert & Ziegler Strahlen Competitive Strengths & Weaknesses

9.5 Polatom

9.5.1 Polatom Details

9.5.2 Polatom Major Business

9.5.3 Polatom Industrial Radioactive Sources Product and Services

9.5.4 Polatom Industrial Radioactive Sources Revenue, Gross Margin and Market

Share (2021-2026)

9.5.5 Polatom Recent Developments/Updates

9.5.6 Polatom Competitive Strengths & Weaknesses

9.6 Board of Radiation and Isotope Technology (BRIT)

9.6.1 Board of Radiation and Isotope Technology (BRIT) Details

9.6.2 Board of Radiation and Isotope Technology (BRIT) Major Business

9.6.3 Board of Radiation and Isotope Technology (BRIT) Industrial Radioactive Sources Product and Services

9.6.4 Board of Radiation and Isotope Technology (BRIT) Industrial Radioactive Sources Revenue, Gross Margin and Market Share (2021-2026)

9.6.5 Board of Radiation and Isotope Technology (BRIT) Recent Developments/Updates

9.6.6 Board of Radiation and Isotope Technology (BRIT) Competitive Strengths & Weaknesses

9.7 DIOXITEK

9.7.1 DIOXITEK Details

9.7.2 DIOXITEK Major Business

9.7.3 DIOXITEK Industrial Radioactive Sources Product and Services

9.7.4 DIOXITEK Industrial Radioactive Sources Revenue, Gross Margin and Market Share (2021-2026)

9.7.5 DIOXITEK Recent Developments/Updates

9.7.6 DIOXITEK Competitive Strengths & Weaknesses
