Abstracts

The industrial refractory pan mixer makes the powder move quickly under the action of external force, the mixing performance is strong, and the materials are mixed quickly. Different parameters and models of the refractory can be used to mix different volumes of materials. The dry powder mixed by fire-resistant mixer has higher stability and stronger production capacity. The production method of the fire-resistant mixer is specialized in flexibility and is suitable for the production of various materials. The refractory mixer uses the frequency converter to adjust the speed, and the energy consumption is low. The refractory provides an efficient form of mixing for materials, enhances mixing performance, and promotes a variety of mixing uses.
