Blenders are multipurpose appliances that have a variety of utilization in the home, business as well as in laboratory. The major function in home and bar application is geared towards ice crushing. Blenders also emulsify softer food ingredients such as yogurt and fruit, which ultimately results in a thick consistency and smooth texture. A blender is developed around a vessel for various ingredients to be blended. Industrial mixers are large sized mechanical device design specifically to meet the large capacity mixing requirement for various application used in manufacturing industries. Industrial mixer is used in Mixing of two or more than two distinctive materials to generate a homogenous product such as the mixture of coal ash and cement are used in a precise ratio to manufacture pozzocrete cement.

Industrial mixer is also widely used in mixing of homogeneous materials to get the desired weight/volume requirement with accurate particle sizing. It is also used in enhancing color, texture, and other essential characteristic of the materials. The wide diversification and ever increasing complexity in design of industrial mixer has led to the careful selection regarding desire capacity level, proper design specification, and precision in order to get effective and efficient mixing.
