## Abstracts

According to our (Global Info Research) latest study, the global Industrial Fractionating Columns market size was valued at USD 1159.6 million in 2023 and is forecast to a readjusted size of USD 1318.1 million by 2030 with a CAGR of 1.8% during review period.

Industrial fractionating columns are usually fabricated as a complete segment and then shipped to the plant site for installation.

However, some manufacturers have introduced modular columns that can be easily assembled at the site. Similarly, there has been the development of 3D printed parts for distillation columns, which may find future adoption in the manufacture of industrial fractionating columns. These technologies can lead to faster development and deployment of fractionating columns than conventional manufacturing techniques.

The Global Info Research report includes an overview of the development of the Industrial Fractionating Columns industry chain, the market status of General Chemical Production (Distillation, Extraction), Petrochemicals (Distillation, Extraction), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of Industrial Fractionating Columns.
