Industrial side entry agitators are mixing devices mounted from the side of a tank, commonly used in large storage and reaction vessels in industries such as oil, chemicals, and water treatment. Driven by a motor mounted on the side wall, side entry agitators provide efficient dispersion, prevent sedimentation, and ensure uniform mixing, especially suitable for creating circulation and temperature control in large vessels. Their compact design minimizes space requirements and simplifies installation and maintenance, making them ideal for large-scale industrial processes requiring continuous agitation.
