Abstracts

The oil and gas industry has given suppliers and manufacturers the opportunity to create products that meet demanding operation needs. Especially when it comes to needle valves and ball valves, there is an ever-increasing need for stronger and better performing valves.

The demand for oil and gas has been persistently on the rise, and it has grown further to develop fuel sources around the world. This demand automatically gave birth to the need for deeper drilled pipelines and lower production costs, all of which demand technicians to choose equipment and hardware more carefully. Due to the variety of operational conditions today, performance expectations are now higher than ever.

Scope of the Report:

This report focuses on the Industrial Valves in Oil and Gas in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Oil and gas industry leaders have strong ties with needle valve manufacturers and suppliers. In the upstream, valves are used to control the flow of oil and has from high pressure injection systems to blow out preventers and choke valves. In the midstream section, where storage and transportation of oil and gas is conducted from deep sea, valves are used to protect equipment while controlling product flow. As the entire systems are supposed to be kept at low temperatures to convert gas into liquids, companies demand that the valve suppliers and manufacturers specifically product parts that are durable in low temperature conditions. The third segment, downstream brings a lot challenges for the refining process of crude oil. This segment feeds raw materials to the petrochemical industry which is why high pressure valve designs are

needed here.

The worldwide market for Industrial Valves in Oil and Gas is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
